

Please do not allow cell phones to be used in flight! As a flight attendant my job is hard enough with loud talking passenger, screaming children and electronic games that people bring on board. It is difficult to control the volume of the portable dvd players, when passengers don't bring the ear splitter and try to watch the movies out loud so more than one person can watch, this alone disrupts the entire cabin. I do not want to be a babysitter to cell phone gawkers!
